PRODUCT DESCRIPTION

Silver Clad is a multi layer laminate of aluminum, coated with a special UV stabilized protection and a PVC backing. This system is highly puncture and tear resistant as well as flame retardant and can be used for exterior and interior facing of hot and cold insulation. It combines an excellent vapour barrier with water tightness.

Silver Clad is a perfect solution for the jacketing of insulated pipes, ducts, boilers, and equipment. A product that combines optimal physical properties, hundred percent water tightness and vapour barrier, resistance against climatic influences with appealing appearance and easy installation.

This innovative jacketing system is the first product of its kind that is suitable for indoor and outdoor applications, in cold and wet climate as well as in hot and dry climate with intense exposure to sunlight.

Silver Clad is replacing costly and complex processible-aluminium and stainless-steel sheet facings and has already started to revolutionise the insulation industry worldwide.
